DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species B in Paper No. 5 is acknowledged. Claim 4 is not going to be examined since it reads on the nonelected Species A (figures 1-7)

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No.5356384 to Haber.

Haber teaches a syringe device with a cap holding section 20a for supposing and holding therein a cap, which covered, a needle position at the extreme end of a syringe barrel.

3. Claim 8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No.5067223 to Bruno.

Bruno teaches a syringe device with a needle separating section 44b for separating the needle which is covered with the cap and fitted on an end of the syringe; further a needle accommodation box 12 having auxiliary unit mounting section on which the needle separating section is mounted.

Claim Rejections - 35 USC § 103

4. Claims 1-2, 5-6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent NO. 5356384 to Haber as described in rejection of claim 7 above, and further in view of US Patent No.5067223 to Bruno.

As mentioned above Haber teaches the invention except for the needle separating section separating only the needle or a needle accommodation box mounted on the cap holding section. Although Haber does not teach the specifics of the needle accommodation box it does teach that it would be advantages to have both a needles accommodation box with the cap removal unit. Bruno teaches a needle accommodation box with a syringes guide section for sliding the disposable syringes device to a predetermined position and a slanting surface.

Therefore it would have been obvious at the time the invention was made to have added the specifics of Bruno's needle accommodation box to Haber's accommodation box because according to Bruno its easier, cheaper and safer to use. And since Haber shows both the box and the cap removal on the same pole, one can mount them together if one chooses to do so, however Haber has demonstrated the advantage of having both the box and the cap removal at the same station mounted to each other or not.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Ghafoorian whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
